

AP1302

Image Signal Processor, 13 MP

Product Overview

For complete documentation, see the data sheet.

AP1302 is an imaging co-processor capable of processing up to 13 MP onsemi primary camera as well as a front facing camera. AP1302 has the ability to handle all image processing functions including interlaced High Dynamic Range (iHDR) operations.

Features

- Primary camera interface
- Primary camera input format
- Output interface
- Output format
- Secondary camera interface
- Maximum resolution
- Maximum frame rate
- Maximum colour processing frequency
- ISP capabilities on chip
- Digital features

For more features, see the data sheet

Applications

- Image Signal Processing

End Products

- IoT
- Drones
- Machine Vision
