

Title of Change:	The change is to improve product package robustness by changing of ICD2PAK 5LD from dual gauge to single gauge frame, change leadframe material from KFC material to HCL-12S, add in mold lock on the heatsink and change mold compound from G600 to G700HF.
Proposed Changed Material First Ship Date:	31 Aug 2023 or earlier if approved by customer
Current Material Last Order Date:	31 Jul 2023 <i>Orders received after the Current Material Last Order Date expiration are to be considered as orders for new changed material as described in this PCN. Orders for current (unchanged) material after this date will be per mutual agreement and current material inventory availability.</i>
Current Material Last Delivery Date:	30 Aug 2023 <i>The Current Material Last Delivery Date may be subject to change based on build and depletion of the current (unchanged) material inventory</i>
Product Category:	Active components – Integrated circuits

Category	Type of Change
Process - Assembly	Change of mold compound, Change in leadframe dimensions, Change of direct material supplier, Change of leadframe base material

Description and Purpose:

To notify customers of the change in leadframe supplier from KOBE to SDI, change leadframe material from KFC to HCL-12S, heatsink thickness from 50mils to 20mils, add in mold lock design on heatsink and change mold compound from G600 to G700HF.

The change is to improve product package robustness.

There is no product marking change as a result of this change.

Reason / Motivation for Change:	Quality improvement			
Anticipated impact on fit, form, function, reliability, product safety or manufacturability:	The device has been qualified and validated based on the same Product Specification. The device has successfully passed the qualification tests. Potential impacts can be identified, but due to testing performed by onsemi in relation to the PCN, associated risks are verified and excluded. No anticipated impacts.
