Description and Durnocau			

Description and Purpose:

This document describes the change of connector that has been implemented to improve the robustness and reliability of the product. Both the old and new connectors are an 8-pin DIP header with 0.3" width, and the same socket can be used for both. Pin assignment remains the same.

Note also that no changes have been made to the sensors, sensor layout, performance, or footprint of the PCB. The diagrams below show the old connector (Figure 1 and Table 1) and the new connector (Figure 2).
