

Title of Change:	Gold wire to bare copper wire conversion and Nitto GE200 to Henkel GR640 molding compound conversion for Diode devices assembled in ON Semiconductor, Leshan facility.									
Proposed Changed Material First Ship Date:	28 March 2020									
Current Material Last Order Date:	11 September 2019 Orders received after the Current Material Last Order Date expiration are to be considered as orders for new changed material as described in this PCN. Orders for current (unchanged) material after this date will be per mutual agreement and current material inventory availability.									
Current Material Last Delivery Date:	11 December 2019 The Current Material Last Delivery Date may be subject to change based on build and depletion of the current (unchanged) material inventory.									
Product Category:	Active components – Discrete components									
Contact information:	Contact your local ON Semiconductor Sales Office or < Andy.Tao@onsemi.com >									
Samples:	Contact your local ON Semiconductor Sales Office to place sample order or < PCN.samples@onsemi.com > Sample requests are to be submitted no later than 45 days after publication of this change notification.									
Sample Availability Date:	26 April 2019									
PPAP Availability Date:	26 April 2019									
Additional Reliability Data:	Contact your local ON Semiconductor Sales Office or < Rui.Zhang@onsemi.com >.									
Type of Notification:	This is a Final Product/Process Change Notification (FPCN) sent to customers. FPCNs are issued 12 months prior to implementation of the change or earlier upon customer approval. ON Semiconductor will consider this proposed change and it's conditions acceptable, unless an inquiry is made in writing within 45 days of delivery of this notice. To do so, contact PCN.Support@onsemi.com .									
Change Category	Type of Change									
Process – Assembly	Change of wire bonding									
Process – Assembly	Change of mold compound									
Description and Purpose: Upon the expiration of this PCN, these devices will be built with 0.8mils bare copper wire & Henkel GR640 HV mold compound at the same site. Datasheet specifications and product electrical performance remain unchanged. Reliability qualification and full electrical characterization over temperature has been performed.

Bond Wire	0.8 mils gold wire	0.8 mils bare copper wire								
Mold compound	Hitach GE200F	Henkel GR640 HV								
There is no product marking change as a result of this change.										
Reason / Motivation for Change:	Change benefits for customer: Copper wire is with higher Thermal conductivity and lower resistivity. Henkel GR640HV has better property to improve package encapsulation performance Risk for late release for customer: Longer lead time due to limited flexibility in terms of manufacturing and capacity planning.									

Anticipated impact on fit, form, function, reliability, product safety or manufacturability	The device has been qualified and validated based on the same Product Specification. The device has successfully passed the qualification tests. Potential impacts can be identified, but due to testing performed by ON Semiconductor in relation to the PCN, associated risks are verified and excluded. No anticipated impacts.	
Sites Affected:	ON Semiconductor Sites: ON Leshan, China	External Foundry/Subcon Sites: None
Marking of Parts/ Traceability of Change:	Products assembled with 0.8mils bare copper wire & Henkel GR640 HV mold compound from ON Semiconductor, Leshan facility and will have a Finish Goods Date Code of WW47, 2019 or later.

Electrical Characteristic Summary:

Three temperature characterization and ESD performance meet datasheet specification. Detail of electrical characterization result is available upon request.

Electrical characteristics are not impacted.

List of Affected Parts:

Note: Only the standard (off the shelf) part numbers are listed in the parts list. Any custom parts affected by this PCN are shown in the customer specific PCN addendum in the PCN email notification, or on the **PCN Customized Portal**.
