

DESIGN/PROCESS CHANGE NOTIFICATION

This is to inform you that a change is being made to the following products.

This is a minor change that has no impact on product quality, reliability, electrical or mechanical performance. Affected products will remain fully compliant to all published specifications. Notification is being made for informational purposes only and there is no approval required. Products incorporating this change may be shipped interchangeably with existing unchanged products.

Please contact your local Customer Quality Engineer if you have any questions regarding this notification. Alternatively, you may send an email request for information to PCNSupport@fairchildsemi.com.

Implementation of change:

Expected First Shipment Date for Changed Product : Feb. 18, 2013

Expected First Date Code of Changed Product : 1308

Description of Change (From) :

Two marking bands on glass body for SOD80 1MC products: one band is the cathode line, the other is a colored band for type identification

Description of Change (To) :

One white marking band on glass body located on cathode side

Reason for Change:

To correct ION P223A which changed from two color bands to one black marking band.

Most of the SOD80 devices were changed from two color bands to one black marking band, except five 1MC die devices which use a light sensitive black body coat with white color bands.

Affected Product(s):

FDLL300A	FDLL333	FDLL3595
FDLL457A	FDLL485B
